Riverside Family Medicine — Office Visit Note with Neurology Referral

Visit Date: 2026-07-20 **Provider:** Elena Marsh, MD

Patient: 29 years old.

Subjective: Patient reports frequent, severe headaches, feels like most days. Reports having tried a couple of different migraine medications over the years without much luck, though cannot recall specific names or exact trial durations today; prior prescription records are not readily available in this note.

Review of Systems: No red-flag symptoms reported. No other botulinum toxin use reported. This appears to be an initial request.

Plan: Referring to neurology for further evaluation. Requesting authorization to proceed with onabotulinumtoxinA pending that consultation.

Electronically signed: Elena Marsh, MD
