Heartland Cardiac Imaging — Echocardiogram Report

Date of Service: 2026-07-01 **Ordering Provider:** Priya Nandakumar, MD **Indication:** Reassessment of left ventricular function, ischemic cardiomyopathy

Findings: Left ventricle mildly dilated. Left ventricular ejection fraction estimated at 28% by Simpson's biplane method. Global hypokinesis, most pronounced in the anterior wall distribution. No significant valvular abnormality. No pericardial effusion.

Impression: LVEF 28%, consistent with ischemic cardiomyopathy.

Signed: Dr. Howard Lin, Cardiac Imaging
