Nandakumar Cardiology — Consultation Note

Visit Date: 2026-07-12 **Provider:** Priya Nandakumar, MD

History: New diagnosis of non-ischemic dilated cardiomyopathy, established 2026-06-15 on the echocardiogram referenced above. Lisinopril and carvedilol were both started at that same diagnosis visit (2026-06-15).

Functional Status: NYHA Class II documented today.

Prognosis: No significant comorbidity; reasonable survival expectation greater than 1 year.

Assessment/Plan: Non-ischemic dilated cardiomyopathy with severely reduced LVEF. Recommend ICD implantation given the degree of LV dysfunction.

Electronically signed: Priya Nandakumar, MD
