Valley Family Medicine — Referral Note

Visit Date: 2026-07-15 **Provider:** Tom Reilly, MD

History: Patient with known heart failure, referenced echocardiogram from 2025-11-20 showing LVEF 30% (attached). No repeat echocardiogram has been performed since that date.

Medication History: Patient was started on lisinopril and metoprolol in December 2025; per pharmacy records (attached), both were discontinued in February 2026 due to symptomatic hypotension. Patient is not currently taking either medication.

Functional Status: NYHA Class IV documented today — patient reports dyspnea at rest and with minimal exertion.

Procedural History: Patient underwent PCI to a circumflex lesion 2 weeks ago (2026-07-02) for an unrelated finding on stress testing. No repeat LVEF assessment has been performed since that procedure.

Plan: Referring patient for ICD evaluation and placement given history of reduced ejection fraction.

Electronically signed: Tom Reilly, MD
