Riverside Physical Therapy — Progress Summary

Patient referred by: Elena Marsh, MD **Treatment Dates:** 2026-05-01 through 2026-06-26
Frequency: 2x/week (16 total visits)

Modalities: McKenzie extension protocol, lumbar stabilization exercises, manual therapy to the lumbar paraspinals, home exercise program with straight-leg-raise stretching progression.

Progress Notes: Patient tolerated treatment well throughout. Subjective pain rating improved from 8/10 to 6/10 over the course of treatment. Radicular symptoms into the left leg persist with prolonged sitting and standing. Patient has been compliant with home exercise program.

Discharge summary (2026-06-26): Continued left-sided radicular symptoms despite 8 weeks of supervised conservative treatment. Discharging back to referring provider for further workup.

Signed: Marcus Feld, PT, DPT
