Ibe Orthopedic Surgery — Consultation Note

Visit Date: 2026-07-13 **Provider:** Samuel Ibe, MD

Subjective: Patient reports left knee pain, describing it as severe and stating she “probably needs a knee replacement.” See attached imaging and conservative management summary.

Additional Findings: BMI 33.1, documented today. Knee clinically free of infection.

Assessment: Left knee osteoarthritis.

Plan: Patient requests to proceed with total knee arthroplasty given symptom severity.

Electronically signed: Samuel Ibe, MD
